# 10 YRS FIIISH & RELEASE

## 10 YEARS OLD AND STILL GOING STRONG!

In 2020, we will celebrate our 10th birthday! We continue to grow but more importantly, to evolve through the constant re-assessment of our development, guided by our passion for fishing, the fish we catch and of course their sparring partners : you !

This year and even more so in the years to come, our Research and Development department, located in Brest, is being strengthened to meet the technical and environmental challenges of tomorrow.

In the coming years, we will continue to nurture our passion for fishing through a variety of technical and ethical projects in Europe and beyond. We have new species of fish to target, new techniques to learn and new fishermen to meet.

Prepare to be surprised!

## NEW PRICES THAT WILL MAKE YOUR DAY!

Thanks to the work of our team here at Fiiish, as well as the continued support of our suppliers, we are happy to offer you reduced prices on selected Power Tail and Candy Shrimp lures!

Enjoy !

## NEW PRODUCTS!

In 2019, you gave a warm welcome to our new Black Eel and Mud Digger ranges, for which we are delighted and send you our heartfelt thanks! It is always greatly satisfying to see that our work is appreciated by all. We will allow you the pleasure of discovering the innovations and additions to our range for 2020, but there are two which we cannot resist telling you about now:

New arrival - Crazy Paddle Tail : compatible with the existing leaded heads found in the Crazy range. It uses our latest innovations : free hook and an inverted paddle with a «new generation» design! After three years of research, we present the new generation of paddles, increasing swimming amplitude and the lure's visibility to predators. From shore to boat fishing, in fresh and salt water, its effectiveness has been validated everywhere!

Additions to the Black Eel range: get ready to rediscover shore catches! We have added a 110mm size to the range, available in two different weights. You will also notice the arrival of the Shallow head for the 150mm size, especially designed to explore the smallest aquatic plant habitat, without a hitch. They will be your best friends in making the best catches!

**NEW**

**NEW 2020 !**

**OUR ORIGINAL PADDLETAIL LURE SYSTEM,  
PROVEN IN SALTWATER AND  
FRESHWATER WORLDWIDE**

THE BLACK MINNOW RANGE OFFERS 6 BODY SIZES (7 TO 20cm)  
AND NUMEROUS JIG HEAD WEIGHTS (3 TO 240g). AN INFINITE RANGE  
OF POSSIBILITIES TO COVER VIRTUALLY ALL FISHING SITUATIONS

**EXTRA SOFT AND  
REALISTIC BODIES**

The extra soft body of the Black Minnow gives the lure a uniquely lifelike and natural swimming action with lots of vibration. A range of highly realistic colours add to the lure's proven attractiveness to all types of fish.

**EXCLUSIVE VMC®  
OFF SET HOOK**

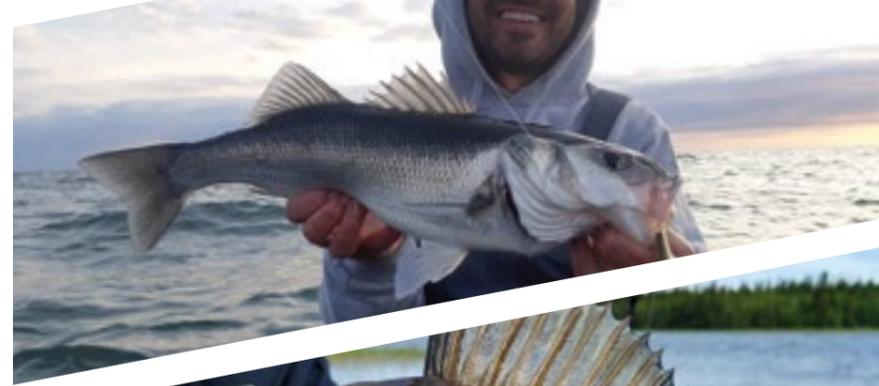

Designed specifically for the Black Minnow®, these wide, extra strong hooks provide the perfect balance for passing easily through long grasses.

**PATENTED PH2S  
RIGGING SYSTEM**

This innovative weedless system is the perfect combination of jig head, lure body and hook. The head and the body of the lure are articulated which increases hook ups and greatly enhances the action.

**WHY THE BLACK MINNOW ?**

Created ten years ago and developed in Brittany for bass fishing, it is the first flexible lure to be marketed, combining a leaded head, a flexible body and a "hidden" hook. Its patented design allows you to fish slowly, scraping along the bottom without snagging. When the fish swallows the lure, the hook emerges naturally: a success!

**UNBEATABLE**

The Black Minnow is undoubtedly the best, a magical lure that has that extra something, a clever mix of proportions between the body's volume, the fin size, the design and the super-soft texture! Often copied but never equaled: To this day the Black Minnow remains THE model for bass fishing!

For 10 years we have been developing and broadening our large range of products annually, allowing you to fish a wide variety of species, in saltwater as well as in fresh.

**AN ULTRA LIFELIKE SWIMMING ACTION THAT PERFECTLY IMITATES A SANDEEL, THIS LURE IS IRRESISTIBLE TO MANY PREDATORY FISH**

THE CRAZY SAND EEL RANGE OFFERS 6 SIZES OF LURES FROM 10 TO 30cm, INCLUDING AN X-STRONG SERIES TO TAKE ON THE MOST POWERFUL FISH

**PATENTED HSV® SWIMMING ACTION**

Lots of research was undertaken by Fiiish in France to develop the unique action of the Crazy Sand Eel patented as HSV® (High Swimming Vibration).

**UV REACTIVE GLOW EFFECT**

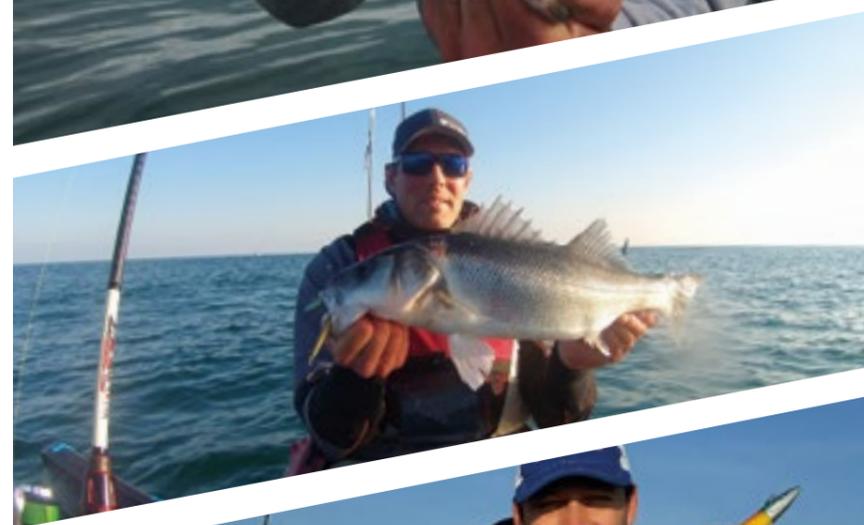

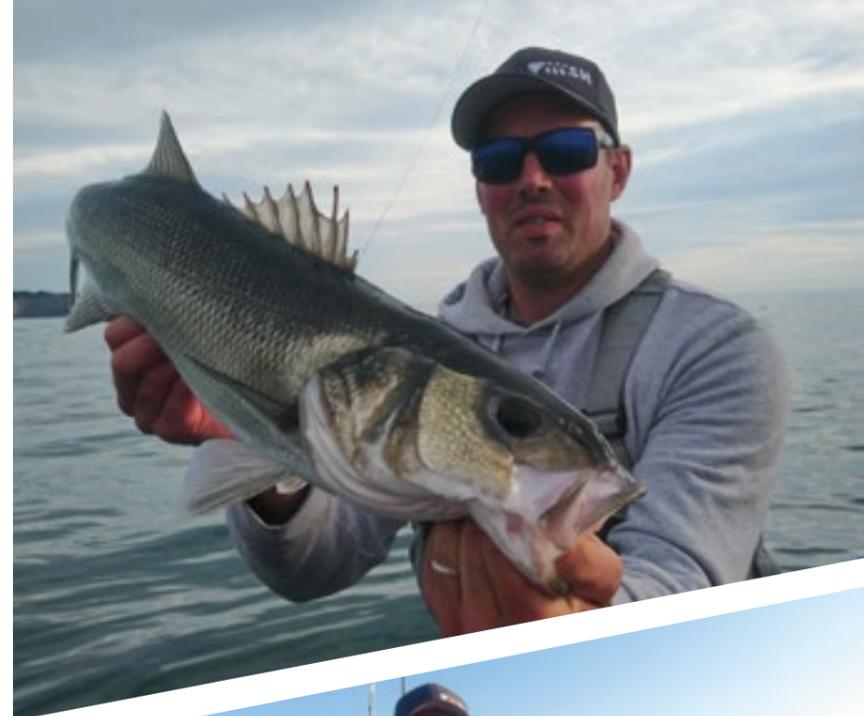

The UV colors improve the visibility of the lure to predators in poorly lit or crowded waters.

GLOW colors restore light through phosphorescence, in areas of low brightness and/or at great depths.

**RATTLE + SCENTED LURE BODY**

Sizes 150-220 incorporate a rattle to imitate the clatter of small baitfish and allow predators to detect the lure.

The body of the Crazy Sand Eel is infused with a proven formula using Anise.

**A LITTLE HISTORY!**

The Crazy Sand Eel is the second flexible lure born at Fiiish! It was developed at the time by the close collaboration between Matt, creator of the company Fiiish, and Doctor Djé, our chief technician!

Both competitors of the Lure Bass National Fishing Championship: «We needed a lure to complement the Black Minnow: faster movement! A lure to fish either above the bottom or below the surface with a strong vibration to attract fish from afar!» explains Matt.

**CREATING THE CRAZY SAND EEL: A LURE UNIQUE IN ITS CATEGORY!**

After several years of research and testing, we found a combination of shapes that allowed us to create a natural swimming action that proved irresistible to fish.

A lure unique in its category: The first flexible lure in the world to have its inimitable swimming action patented. In the hands of an experienced angler, it becomes as realistic as a real living fish. Its swimming action really appeals to predators! They go crazy! Hence its name: «Crazy Sand Eel».

# CRAZY

## PADDLE TAIL

### THE CRAZY RANGE HAS GROWN: A NEW LURE, A NEW CONCEPT!

A FORMIDABLE LURE THANKS TO ITS INVERTED PADDLE.  
HYPER-EFFECTIVE ONCE IN ACTION,  
ITS THE IDEAL LURE TO USE IN TRACTION!

#### PARTICULARLY EFFECTIVE

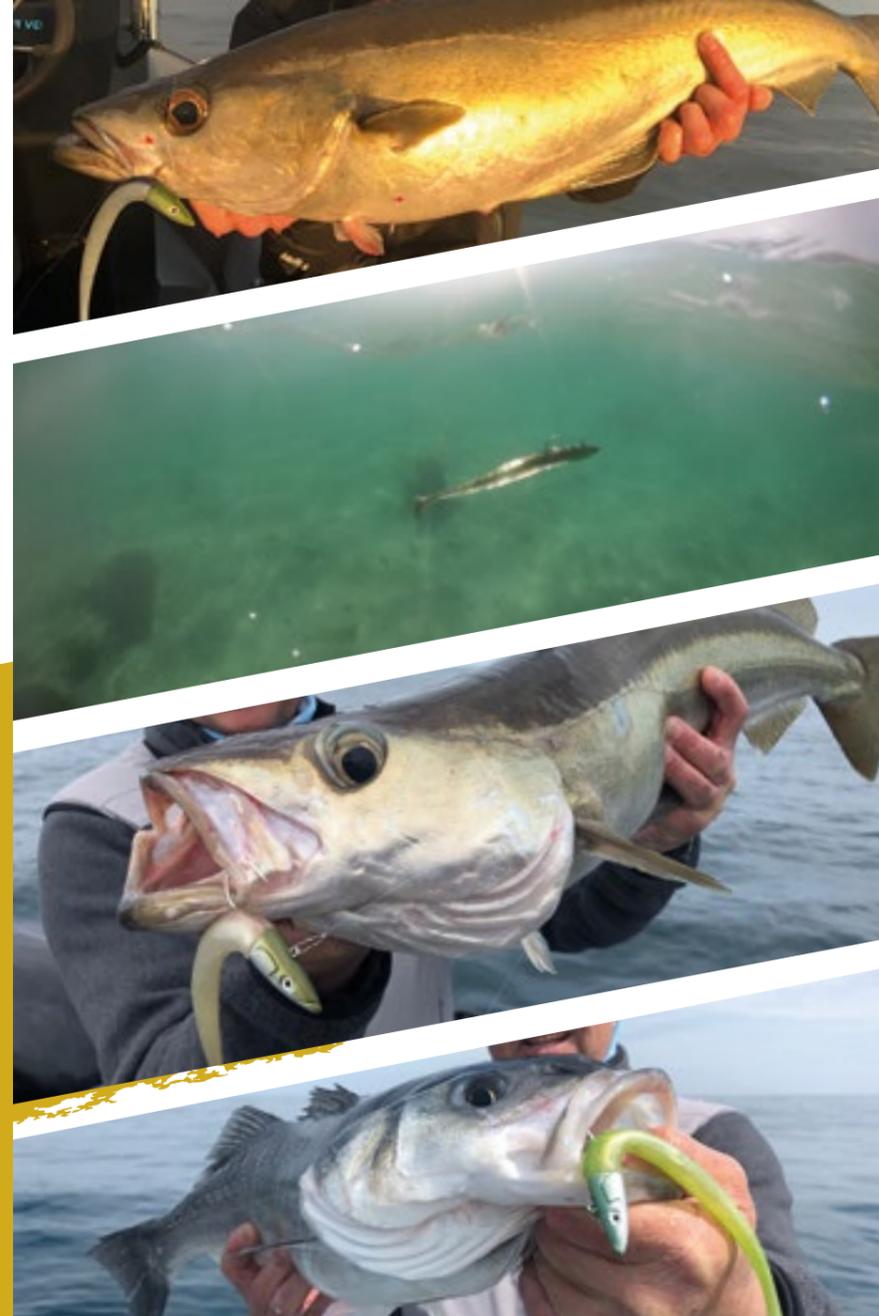

- The Crazy Paddle Tail is used for traction or linear fishing in open water
- It is particularly effective on active fish, in rough conditions (winds, currents, waves)

#### FREE HOOK

- A new free-hook concept allowing for:
- Better lure mobility
  - Easier assembly
  - A stronger lure

#### INVERTED PADDLE

A fluid and realistic swimming action: the inverted paddle activates the lure quickly and produces the ideal action whilst descending!

#### AN ADDITION TO THE CRAZY RANGE!

The Crazy range is designed for fishing in open water, well away from the floor. It is ideal for traction fishing!

This range now includes a new body that fits all CRAZY SAND EEL heads.

#### WHY THE CRAZY PADDLE TAIL?

The latest research by Fiiish has led to the development of this new body, the CRAZY PADDLE TAIL, with an inverted paddle. This concept allows for more efficiency:

- In hyper-slow action,
- During the accompaniment phases of the descent,
- On ultra-slow linear traction.

It responds very well to variations in speed, from very slow to fast pulls: it is formidable!

Its movement combined with the volume of water that it displaces give the impression of a «tired» fish, attracting bigger and generally slower predators.

*It's a record-breaking fish lure!*

**AS REALISTIC AS A FISH, THE POWER TAIL USES ITS INNOVATIVE PTC® CONCEPT IN THE BODY-PADDLE COMBINATION**

**THE POWER TAIL EXISTS IN 3 VERSIONS: FRESHWATER, SEA AND SQUID: CHOOSE FROM A WIDE RANGE OF COLOURS!**

**POWER TAIL CONCEPT**

POWER TAIL® is a patented concept whose innovation lies in the combination of the body and paddle.

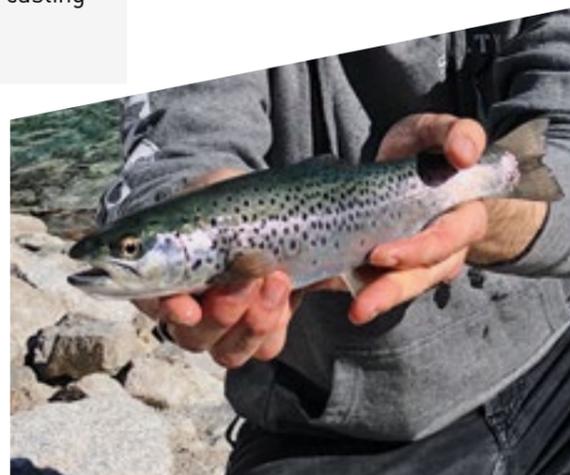

As realistic as a fish, it has a hard, transparent fin that propels the body and slows down its descent.

**ACTION !**

- An intense action at high speed and in s trong current.
- Paddle-style tail fin gives the lure a slow sink rate with intense vibrations.
- Effective in both freshwater and saltwater.
- Excellent long distance casting capabilities.
- Also used in trolling

**SUPER DISTANCE**

Whether on the shore or fishing from a boat in the thick of the action, the aerodynamics of the new Saltwater Power Tail® will help you cast long distances and cover plenty of ground.

**THE POWER TAIL CONCEPT:**

This unique concept came from the observation that flexible lures can have certain limits. Using flexible lures amongst agitated fish with extremely sharp teeth, we often found ourselves left with only half a lure ! It was time to create something a little more resistant.

But we still wanted it to be used and to swim like a flexible lure. For that, it had to move naturally whilst descending, as well as offering the possibility to fish in all parts of the water and at various speeds.

The patented plastic fin makes the Power Tail a real success! It is a rather heavy lure but does not descend too fast, it launches very well and with precision. One of the few lures that can be used in difficult conditions: strong currents, strong winds, rough water. An absolute must for any angler!

**AN INNOVATIVE CONCEPT FOR MAXIMUM UTILISATION!**

**• Sea version:**

Ideal for hunting, when it is imperative to achieve good casting distances. Indispensable in heavy seas when it is difficult to get close to the edge. Effective when there is wind. Thanks to its fin the line remains tight, which allows you to keep in contact with the lure and feel what is happening! Perfect on toothed fish such as barracuda or skipjack.

Resistant, its thorough reinforcement allows for catching tuna or exotic fish.

**• Freshwater version:**

Whether in flowing water like rivers and streams (trout and asp) or stagnant water like pond and lakes (perch, trout), its clever action will allow you to quickly catch any active fish in the area (Power Fishing). Accuracy and an optimized casting distance: a dense lure but which swims slowly thanks to the Power Tail Concept. Increased performance when retrieved slowly!

# POWER TAIL SQUID

**WATCH OUT CUTTLEFISH AND SQUID!  
THE POWER TAIL SQUID HAS ARRIVED!**

**WEIGHING FROM 15 TO 50G FOR THE PLEASURE OF  
CEPHALOPODS EVERYWHERE!**

**POWER TAIL CONCEPT  
CEPHALOPODS SPECIAL**

Specifically designed for cephalopods. Like the original, the Power Tail Squid has the same patented concept: a hard, transparent fin that creates action for the body and slows its descent by creating maximum vibrations.

## GLIDER HEAD

The head of the Power Tail Squid is designed as a "glider head" so that it sinks quickly and can effectively be fished along the bottom, with the lure being presented at a 45° angle for maximum effectiveness.

## UV REACTIVE / GLOW EFFECT

Some Power Tail Squid react to ultra-violet light that penetrates deep down into the water. Others emit light through phosphorescence (Glow effect). These colors improve the visibility of the lure to predators in poorly lit or crowded waters or even at great depths!

## INNOVATIVE HOOKING SYSTEM: NO SNAGS!

- Unlike existing squid jigs, the hooks are placed on the back of the lure above the lure's paddle.
- The cephalopod will grab the lure closest to the hooks for maximum success.
- With the hooking system at the back of the lure you will not get stuck on the bottom.

## THE POWER TAIL SQUID IS MUCH MORE THAN A CONCEPT!

The Power Tail Concept is first and foremost a strong lure that swims slowly thanks to its patented plastic fin. It seemed obvious to us to adapt it to cephalopod fishing! With its clamps-head, basket and phosphorescent hues, it is 1000% effective !

## GLIDES WITH A SWAYING ACTION TO FISH FOR SPARIDAE

THE CANDY SHRIMPS ARE GOING TO WHET THE APPETITE OF YOUR FUTURE BITES!

### PERFECTLY PROTECTED HOOK!

The Candy Shrimp is a highly realistic shrimp and prawn imitation. It features a new innovative HPC® hook protection concept, limiting the potential to hook the bottom.

The hook is presented with the point upwards away from the sea bed. This ensures a better hook up ratio when a fish attacks, especially with fish that have small mouths.

### THE PHOSPHORESCENT EFFECT!

The glow effect emits light for a noticeable time after exposure to a light source! This makes the lure visible in poorly lit areas or at great depths!

**FOR MAXIMUM EFFICIENCY, RECHARGE YOUR LURES USING A UV LAMP!**

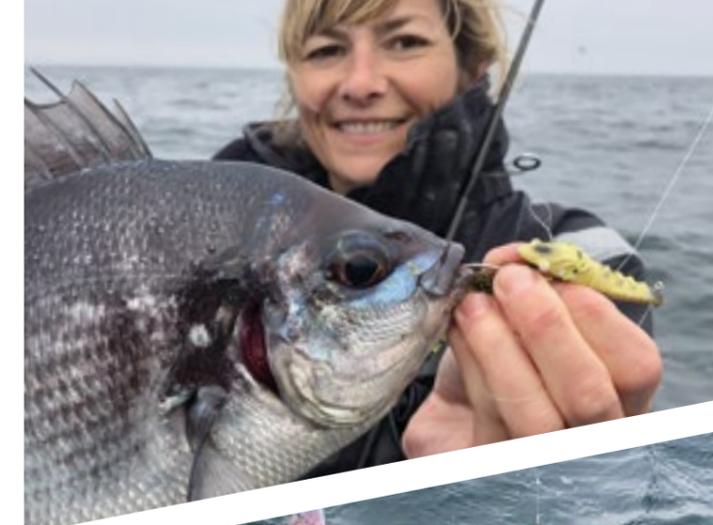

### WHY CANDY SHRIMP?

The sea bream has a small mouth full of teeth that can inflict serious damage. They are not easy to hook and are extraordinary fighters, an angler's dream! We owed it to ourselves to develop a lure especially adapted to sea bream!

These fish are found mostly at the bottom of the water and at significant depths. We therefore had to create a small lure that could descend easily to the bottom with a minimal amount of snagging.

After several tests with different prototypes, here it is! We present you with our version of the Inshiku. This lure never fails to catch fish: a real treat for sea bream! This imitation shrimp with its life-like mobile legs and hidden hook system makes all the difference.

# MUD DIGGER

THE INVERSED FIN CONCEPT OFFERS GREAT  
VERSATILITY FOR SLOW AND DECISIVE  
FISHING IN FRESHWATER

FROM OUR RESEARCH ON ZANDER FISHING,  
THIS LURE COMBINES SEVERAL INNOVATIONS  
TO GIVE IT EXCEPTIONAL ABILITIES AND ATTRACTIVENESS!

## GLIDER HEAD, 3 ACTIONS

- **Stabilises the lure:**  
In «vertical» fishing, this type of head allows the lure to remain horizontal for a time, a few centimeters above the bottom; a position that greatly attracts predators.
- **Slight gliding action:**  
The flat surface on the underside of the «Digger» head slows down the lure's descent and boosts the body's action.
- **Excellent positioning on the bottom:**  
The head naturally lands on the bottom whilst the body of the lure continues to float slightly, continuing its swimming motion. In addition, the position of the upward hook gives a better result after bites.

## NEW CONCEPT

## FREE HOOK, INCREASED PERFORMANCE

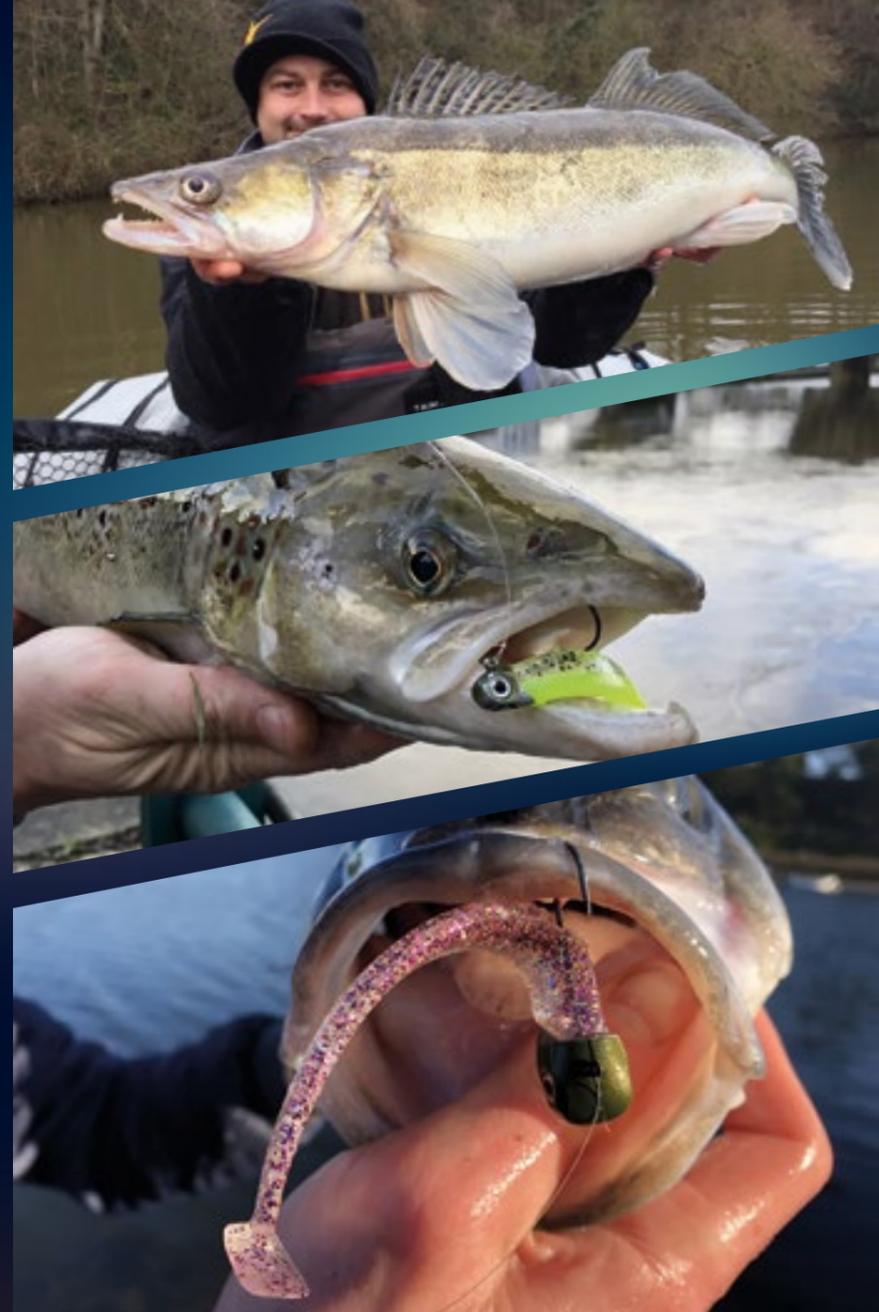

- **Lure mobility:**  
The opening where the hook protrudes increases the flexibility and reactivity of the lure to rod actions.
- **Easier assembly:**  
The opening serves as a guide to positioning the hook without difficulty. Just prick straight!
- **A stronger lure:**  
This concept significantly avoids the body ripping during the bite.

## INVERTED PADDLE

- **Activates very quickly:**  
The tapered body and small upward flipper give a superbly reactive natural swimming action. This movement is generated with the slightest solicitation, making it incredibly lively and very attractive!
- **Superb descending action:**  
Its incredible efficiency is due to its descending action! It is often during this decisive phase that the fish attack! Watch out, this concept will make all the difference!

## WHY THE MUD DIGGER?

Zander fishing requires a technical and subtle approach. Many anglers had told us that they had made some good catches using the Black Minnow, so this piqued our interest. The zander's contact is so subtle that it is often difficult to get it to bite with a hidden hook, which is why we added a triple hook on the back of the lure. What's more, the majority of bites happen over the last 50 centimeters or so, before the lure reaches the bottom and at a very precise speed of descent.

We therefore needed a lure that would be even more sensitive, more alive, more reactive and show up well at the bottom! With the Mud Digger we have met all these criteria. This lure really makes the difference when fishing in difficult circumstances.

# BLACK EEL<sup>®</sup>

**NEW LURE, EVEN MORE LIFELIKE  
FOR EVEN MORE CATCHES!**

THE COMBINATION OF A HIDDEN HOOK, INVERTED PADDLE AND A TAPERED BODY OFFERS THE FISHERMAN A SUPERBLY RESPONSIVE AND REALISTIC SWIMMING ACTION TO CLINCH SLOW CATCHES!

### **INVERTED PADDLE**

- **Activates very quickly:** The tapered body and small upward flipper give a superbly reactive natural swimming action. This action is generated with the slightest of movements, making it incredibly lively and very attractive!
- **Superb descending action:** It is often during this phase, imitating a fish fleeing to hide, that predators attack! This lure excels in these conditions!

### **PATENTED PH<sup>2</sup>S ATTACHING SYSTEM**

This innovative system has been designed to allow the use of a hidden hook. It increases the longevity of the lure through better support of the head and body. It also facilitates assembly of the lure.

### **EXCLUSIVE HOOKS DESIGNED BY VMC<sup>®</sup>**

- The hook developed for the Black Minnow appears on this lighter «Shad» type lure. It is perfectly balanced to optimize the lure's swimming action whilst maximizing strike efficiency. Extra strong for the heavier fish!
- A hook compatible with two different lures: Black Minnow and Black Eel.

### **WHY THE BLACK EEL?**

Following our research on the Mud Digger, and given its amazing efficiency, we decided that it should be tested at sea...

The Black Eel is the result of many years' work, combining the hidden hook system of the Black Minnow with the Mud Digger's profile and inverted fin. This lure continues fishing when others cannot! When there is a slight current or fishing is difficult, this is the lure that makes the difference. In slow scratch or linear fishing, it is easy to use and incredible efficiency. It has already been adopted by many competitors! Today, we are continuing to develop new sizes to adapt to all situations ... to be continued!

**THE PERFECT LINK IS THE PERFECT COMBINATION FOR OPTIMUM LINE STRENGTH**

**THREE PRODUCTS TO COMPLIMENT EACH OTHER HIGH QUALITY: BRAID, FLUOROCARBON, LURE CLIP AND IN 4 SIZES : LIGHT, MEDIUM, STRONG, X-STRONG.**

Choose three products (Braid / Fluoro / lure clip) in the same packaging colour to give a consistency of size, diameter and breaking strain.

**BRAID**

Perfect Link® 8 Strand Braid provides the ultimate strength, distance and smoothness, together with excellent abrasion resistance

**FLUOROCARBON**

100 % Fluorocarbon. Comprised of three layers with high abrasion resistance.

**LURE CLIP**

The Perfect Link® lure clips are made from the highest quality stainless steel. They are compact, strong, discreet and offer the best action for your Fiiish lures.

**WHAT MADE US CHOOSE THE PERFECT LINK RANGE?**

The Perfect Link idea came to fruition as a result of our experience in competition. For an enhanced performance, we have optimised the assembly of the weave, fluoro and fastening so that the breaking point is above the latter, and not in the weave-fluoro connection. This concept therefore avoids, as much as possible, having to repeatedly retie knots whilst fishing.

**HOW TO MAKE YOUR KNOTS?**

BRAID/FLUOROCARBON & FLUOROCARBON/LURE CLIP

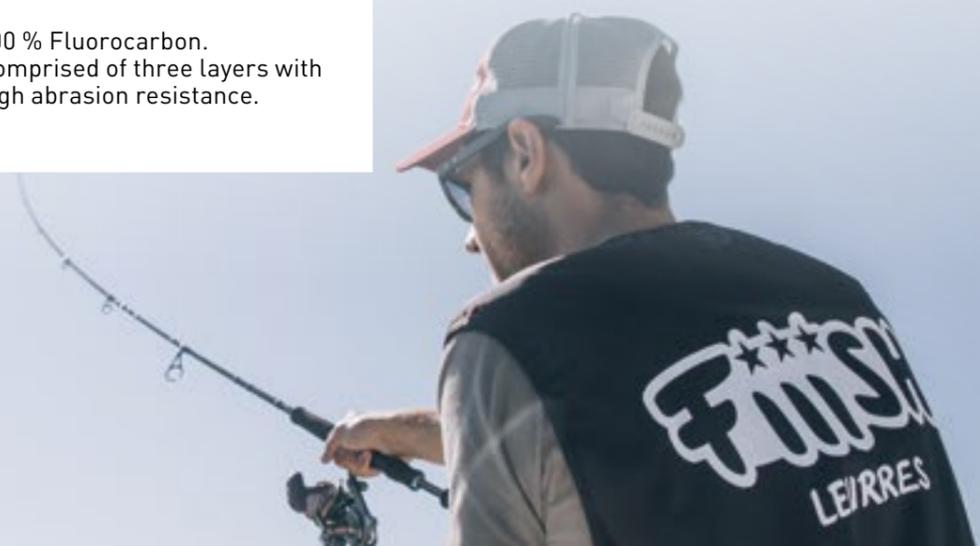

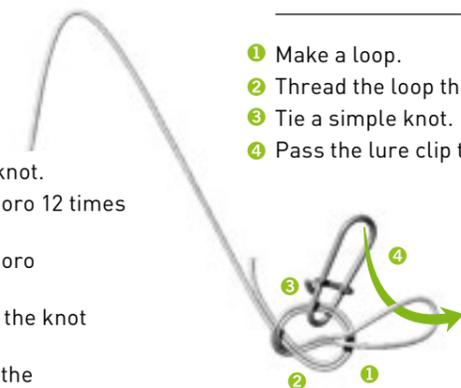

**PEIXET TO ATTACH BRAID TO FLUORO**

- 1 Make a simple knot in the Fluoro at about 5cm..
- 2 Pass the braid through this knot.
- 3 Pass the braid round the Fluoro 12 times downwards.
- 4 Pass the braid round the Fluoro 8 times upwards.
- 5 Pass the braid back through the knot in the fluoro.
- 6 Make 5 half hitch knots with the braid up the fluoro.
- 7 Tighten the knot by pulling on both the fluoro and braid.
- 8 Trim the tag ends of braid and fluoro.

**PALOMAR TO ATTACH LURE CLIP TO FLUORO**

- 1 Make a loop.
- 2 Thread the loop through the lure clip.
- 3 Tie a simple knot.
- 4 Pass the lure clip through the loop.

# ATTRACTANT

**CONCENTRATED ACTIVE SMELL  
100% NATURAL INGREDIENTS**

ATTRACTANT FIIISH IS: 2 COLOURS, RED AND NATURAL.  
ITS 40g CONCENTRATED SOLUTION  
WITH SLOW DIFFUSION FOR RAPID RESULTS!

- For best results, apply the Attractant to your lure in situ or preferably 24hrs before fishing.
- For better conservation, keep the product in a cool place out of the light

## THE NATURAL ATTRACTANT

The effectiveness of this formula is due to a combination of amino acids (palatable to fish) and fish oils.

Its powerful smell effectively disperses through the water to ensure fast results.

### RED

Place at the front of the lure to act as a target spot or to mimic a wounded distressed fish. Easy prey for a voracious predator!

### NATURAL

Use a small spatula to smear the Natural Attractant along the sides of your Black Minnows.

# THE GLUE

CYANOACRYLATE D'ÉTHYLE

**THE PERFECT SOLUTION FOR GLUING AND REPAIRING YOUR SOFT PLASTIC LURES**

ULTRA-PERFORMING FOR MAXIMUM EFFICIENCY OF YOUR LURES

## INCREASE THE EFFICIENCY OF THE LURE

Sticking the jig head to the body of the lure increases resistance and enhances the lure's action in the water. The Glue has been developed specifically for soft plastic lures.

## QUICK-SETTING! DRIES IN SECONDS

Ultra-strong, The Glue dries in seconds for a firm hold!

## USE

- Use The Glue to repair your damaged soft plastic lures.
- Ensure the surface of the lure is dry before use.
- Pour slowly over the desired area.
