

Dear Fishermen,

We are pleased to present you our new range of products. It is a concentrate of our best references which have shown to work around the world.

In order to avoid supply disruptions linked to pandemic situation, our Logistic Team has reconsidered its tasks to supply products smoothly.

We are strengthening the Research & Development Department to respond to ecological transition and preparing for the future.

We thank you all for following us and sharing more and more photos on social network.

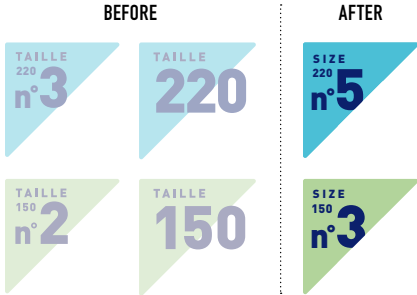

We wish you a wonderful 2022 season!

Fiiish Team

CHANGE ON THE NUMBERING OF CRAZY 150 & 220

To gain readability and help our users choose the right spare parts, we are generalizing our size system.

ENGLISH PACKAGING

We are growing and selling our products today in many countries, which is why our packaging will now be in English.

GLOW COLORS

There are phosphorescent colors that bring the light back in the dark for a certain period of time after having been exposed to a light source. Glow lures recharge even better thanks to ultraviolet rays. Therefore, a UV lamp is recommended to recharge your lure. You will then get a higher and lasting visibility in the dark. The potential of the Glow colourings is best expressed in the deep sea or at night.

UV COLORS

Generally called UV colors, we should rather speak of fluorescent colors. They do not emit light in complete darkness but have the ability to become bright (fluorescent) at any light source. Thus, UV-colored lures are particularly recommended when sun is low (dawn and dusk), weather is cloudy or water is murky because they are then more visible.

ACCESSORIES

The perfect combination!

BRAID

This 8-strand braiding makes it ultrasensitive, round, smooth and silent thanks to:

- A high performance HDPE material.
- A first hydrophobic coating.
- A second coating which promotes sliding it in the rings.

FLUOROCARBON

100% fluorocarbon!
Composed of 5 layers :
abrasion resistant, slide quality
and flexibility.

LURE SNAPS

Our snaps are made from high
quality stainless steel. They are
compact, discreet and offer the best
action for your lures.

KNOTS THAT WE LIKE...

PEIXET

To attach braid to fluo

- 1 Make a simple knot in the Fluoro at about 5cm
- 2 Pass the braid through this knot
- 3 Pass the braid round the Fluoro 12 times downwards
- 4 Pass the braid round the Fluoro 8 times upwards
- 5 Pass the braid back through knot in the fluoro
- 6 Make 5 half hitch knots with the braid up the fluoro
- 7 Tighten the knot by pulling on both the fluoro and braid
- 8 Trim the tag ends of braid and fluoro

PALOMAR

To attach clip to fluoro

- 1 Make a loop
- 2 Thread the loop through the lure snap
- 3 Tie a simple knot
- 4 Pass the lure clip through the loop

ACCESSORIES

ATTRACTANT

NATURAL ATTRACTANT

The effectiveness of this formula is due to a balanced combination of amino acids, fish appetizers, fish oils and texturizers. This lipoprotein solution, without metallic flakes (because of pollution), is extremely oily and water resistant to ensure quick results.

CONCENTRATED ACTIVE SMELL,
100% NATURAL
INGREDIENTS

RED

Apply at the back of the jig head to mimic the gills, under the stomach to act as "a wounded distressed fish", along the body to increase the voracious predator's catch. As a blood signal, the red attractant colors the lure.

GAM 383 Red - 40g

NATURAL

Use a spatula to smear the Natural Attractant along the lure's body. Black minnow's ridges are ideal for this. The Natural Attractant does not change the color of the lure.

GAM 385 Natural - 40 g

THE GLUE

USE THE GLUE TO REPAIR
YOUR DAMAGED SOFT LURES

INCREASE THE EFFICIENCY OF THE LURE

Sticking the jig head to the body of the lure increases resistance and enhances the lure's action in the water.

The Glue has been developed specifically for softplastic lures.

QUICK-SETTING!
DRIES IN SECONDS

HOW TO USE IT?

1. Pour a tiny drop carefully (very fluid glue) over the desired area. Avoid to make the nozzle of the tube touch the lure so that it does not block over time.
2. Apply a small pressure for a few seconds.
3. Go fishing!

GAM183 10 g - By unit in the cash register

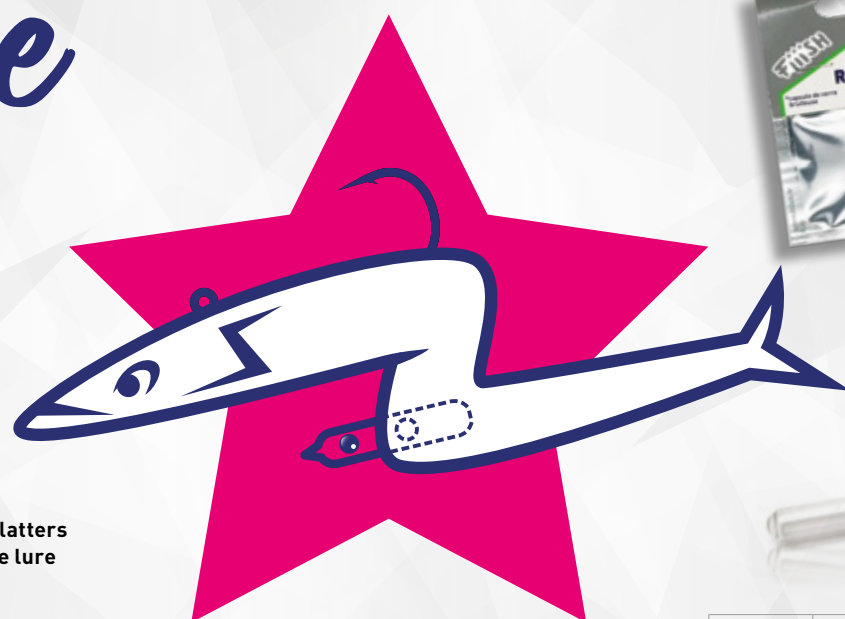

GAM1352 10 g - Unit Packaged

Rattle

NOISY GLASS CAPSULE

It reproduces the small baitfish's clatters and enables predators to detect the lure in turbid or tinted water.

x5

GAM 321 5 Rattles

Original Quick Clip

Adjust the opening of the Quick Clip to match the size of your hook for optimal efficiency.

HOLD & RELEASE YOUR HOOK

An accessory that holds the hook to the body of the lure during casting and retrieval, and releases it when hooking. Easy to use, it improves the presentation of the lure and increases lifespan.

ADAPTABLE
ON ALL YOUR
SOFT PLASTIC
LURES!

NEW

SOFT PLASTIC LURES

Freshwater
& Saltwater

“SEVERAL CONCEPTS ON THE SAME LURE
FOR MAXIMUM EFFICIENCY”

This lure with multiple concepts, developed for pike fishing, allows year-round use in all conditions. The Blaster Shad has been developed to adapt to all pike habitats.

Original
Quick Clip

An accessory that clips the armament to the body of the lure during the fishing stages (casting and retrieval) and releases it when hooking. Easy to use, it improves the presentation of the lure and increases its lifespan.

New Generation Paddle

The amplitude is increased to move as much water as possible at very low speed to make the lure visible from afar.

Inversed Paddle

Ultra responsive swimming, in motion or at break.

PATENTED CONCEPT
PLAYER
ONE HEAD - MANY OPTIONS
MORE STRIKES

Video
PLAYER CONCEPT

1 **PLAYER** Head

A single head compatible with several bodies lengths & colors. Go fishing with the same lure, in different water depths at different speeds.

2 **PLAYER** Block

By combining Light (Plastic) and Medium (zinc) Player Block in the Player head, you will fish at several speeds and depths. The more Medium Block you have, the deeper and/or faster you will fish.

3 **PLAYER** Stinger

Resistance: + 40 lb (+18 kg)
Armament
Specially developed for the Blaster Shad, it allows the locking of Player Block in the head.
Quick snap
With its rolling swivel, it gives freedom of movement, in this way it is harder to unhook during the fight.
Hook
Developed in partnership with VMC to maximize the efficiency of the hooking.

2 TAILLES

SIZE n°1 | 13 cm SIZE n°2 | 16 cm

Even More
Combinations!

By combining these new Heavy Player Block to versions Light and/or Medium, you increase the adjustment possibilities of your lure, from 0 g to 30 g.

Why Player Block in Tungsten?

To fish deeper

In the absence of current, wind or high speed drift, the Player Block Heavy allow you to fish comfortably up to 20 meters deep.

In acceleration phase

When retrieval needs to be fast to trigger attacks, Heavy Player Block will further stabilize your Blaster Shad with no speed limit!

Conform with the 2X Strong category of VMC, extra strong
for big catches.

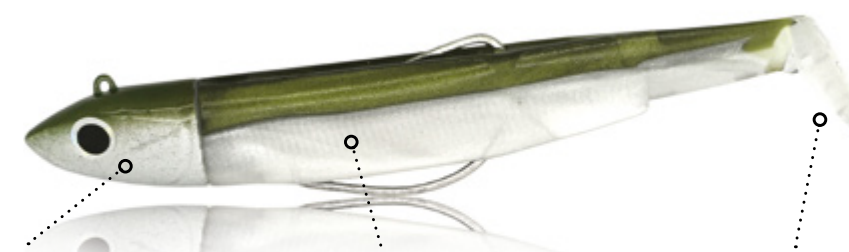

DEVELOPED BY US,
PRODUCED IN FRANCE BY VMC.

SOFT PLASTIC LURES

Freshwater
& Saltwater

**BLACK
MINNOW[®]**

“A UNIVERSAL LURE THAT HAS PROVEN
ITS WORTH IN THE ATLANTIC, THE MEDITERRANEAN
AND FRESHWATER”

Interchangeable head

Developed to fit perfectly
to the body and painted with
the same color.

There is up to 8 heads of different
weights and specific actions
for the same size.

Thanks to this, all kinds of fishing
are possible

X-soft body technology

Bodies are poured by hand,
which gives flexibility
to plastic and an unequalled
color range.

Ultra-natural swim

Like all lures from the Black Family,
the emphasis is given to natural.
This paddle design develops a smooth
swim with a sound signature very close
to that of real prey.
Guaranteed success!

The Black Minnow paddle is transparent
to accentuate realism!

SOFT PLASTIC LURES
Freshwater
& Saltwater

“EIGHT YEARS AFTER THE ARRIVAL OF THE BLACK MINNOW,
WE HAVE COMPLETED THE BLACK FAMILY WITH THE ARRIVAL
OF THIS LONG AND THIN LURE”

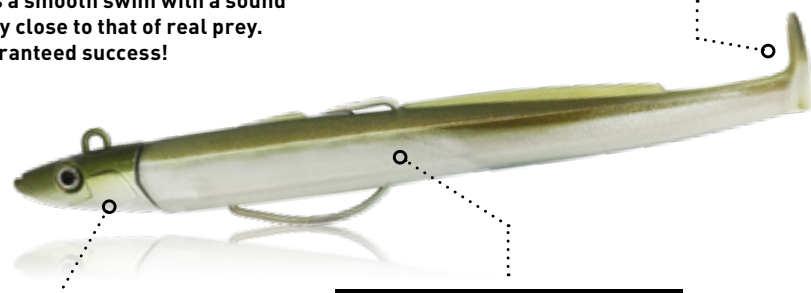

Complementing the Black Minnow, the Black Eel stands out like no other when the current slows down or by small coefficients. For beginners and experts alike, for linear or vertical fishing, use it in all simplicity.

Ultra-natural swim

Like all lures from the Black Family, the emphasis is given to natural. This paddle design develops a smooth swim with a sound signature very close to that of real prey. Guaranteed success!

Inversed paddle

Responsive to the slightest movement and the slightest current, the inversed paddle enables the lure to swim both in the recovery phase (pull up or linear) as in the pause or descent phase (decisive for the attack). Thanks to the Black Eel you increase your chances of catching a fish!

Interchangeable head

Developed to perfectly fit in the body and painted with the same color.

There are several weights of heads for each body size, used for off-shore or shore fishing.

Compact soft body technology

Lure manufactured by plastic molding with high performance material for better resistance.

Multi-color injection molding to obtain colored bodies in the mass for a natural and lasting result.

The body is infused with Anise to thwart predators' mistrust.

“TO CATCH ACTIVE FISH IN OPEN WATER OR POWERFUL CURRENTS”

CRAZY HEAD

Design

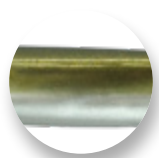

It is designed for effective fishing in the entire water layer while increasing the wobbling of the lure. It is suitable for whitewater fishing (strong currents, rough sea, etc.)

Balance

Heads from the Crazy range are used for both vertical and casting/retrieving fishing (linear and vertical fishing, pull up, etc.)

WITHOUT
DISRUPTIVE
ENDOCRINE
NO ARSENIC

COMPACT SOFT BODY TECHNOLOGY

Multi-injection molding

Lure manufactured by plastic molding with high performance material for better resistance.

Colors

Multi-color injection molding to obtain colored bodies in the mass for a natural and lasting result.

Fragrance

The body of the Crazy Sand Eel is infused with Anise to thwart predators' mistrust.

SOFT PLASTIC LURES

Freshwater
& Saltwater

“A COMPLETELY CRAZY LURE THAT MAKES THE DIFFERENCE ON ACTIVE FISH”

Video
TECHNIQUES
AND USE IN KAYAK

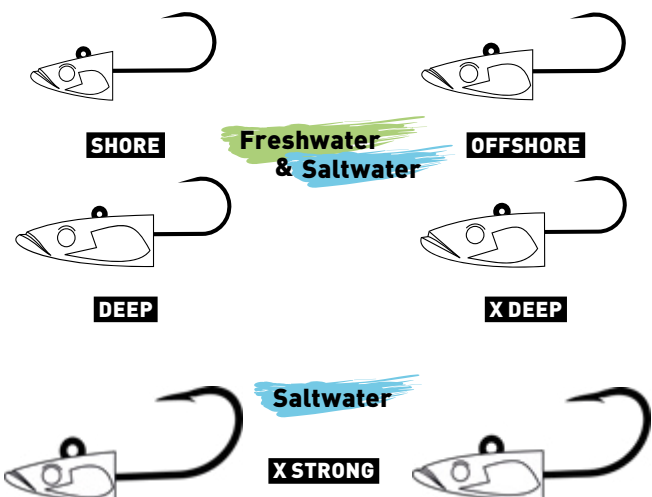

Patented swimming action

Thanks to a lot of research undertaken in Brittany to mimic living garfish or sand eel, the Crazy Sand Eel's unique swim is irresistible to the majority of saltwater predators on our shores!

6 HEADS

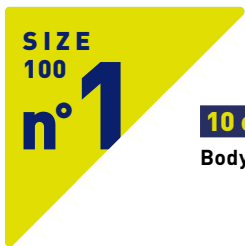

4 weights of the CRAZY heads are available, depending on the sizes. It allows fishing in a maximum of conditions: current, wind and depth. They have the same specific features which allow casting/retrieving or vertical, shore and off-shore fishing.

“PRODUCES STRONG VIBRATIONS
AT SLOW RETREIVE SPEEDS”

Free hook

The opening is used as a point of reference to position the hook without difficulty. Just insert the hook straight without being concerned about the curvature of the hook. The mobility and reactivity of the lure are increased while fishing.
The hook is released more easily during suction and the hooking is more efficient. This concept considerably avoids tearing the body during the fight.

New generation paddle

The design and volume of this new generation of Paddle have been specifically designed to move as much water as possible at very low swimming speeds. In a volume of water, the emitted low frequency wave is spreading.

Inversed paddle

Swimming action at the slightest request and at the slightest movement during all fishing phases, both during breaks and recovery phases.

IDEAL FOR FISHING

“MORE REACTIVE, MORE ALIVE!”

From our research on zander fishing, the Mud Digger is a lure combining our last concepts to thwart the most difficult fish's mistrust. Developed for both shore and off-shore fishing, it will never leave you!

Free hook

The opening where the hook protrudes increases the flexibility and reactivity of the lure to rod actions. It makes the suction easier for the fish.

This concept significantly avoids the body ripping during the bite. The opening serves as a guide to positioning the hook without difficulty.

Ultra natural swim

This paddle design develops a soft swimming action which the sound is close to a real prey.

Inversed paddle

The swimming action is generated with the slightest solicitation and movement, during all fishing phases, breaks and recovery phases.

Hybrid body

Perfect combination between a finesse type lure and a Paddle Tail. It thwarts the most difficult fish's mistrust, vibrating ingeniously and naturally. It is developed both for vertical and linear fishing near the bottom.

Compact soft body technology

Lure manufactured by plastic molding with high performance material for better resistance.

Multi-color injection molding to obtain colored bodies in the mass for a natural and lasting result.

Anise-based aroma, effective in freshwater and saltwater.

Glider head Material

The Mud Digger's head is developed for agliding descent. The flat surface on the underside of the "Digger" head allows it to land on the bottom while the body of the lure continues to float slightly.

In "vertical" fishing, this type of head allows the lure to remain horizontal for a time, a few centimeters above the bottom; a position that greatly attracts predators during slow drifts.

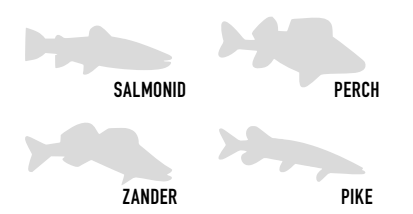

Video
PRESENTATION

THE BODY OF THE MUD DIGGER,
USED IN DROP SHOT OR TRAILER
IS EXCELLENT

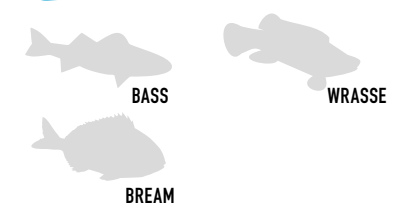

WHEN AND WHERE TO USE IT?

Versatile and easy to use, the Mud Digger fishes also well in freshwater as at sea for delicate, slow and scratch fishing. It targets the majority of predators, depending on its size!

"THE ONE IN ITS KIND, A TRUE 'POWER FISHING' LURE!"

The patented plastic fin makes the Power Tail a real success! It is a rather heavy lure but does not descend too fast, it launches very well and with precision. One of the few lures that can be used in difficult conditions: strong currents, strong winds, rough water.

Freshwater

Saltwater

POWER TAIL CONCEPT®

Power Tail® is a patented concept whose innovation lies in the combination of the body and paddle.

This concept is characterized by a continuous realistic swim and a long precise casting distance!

ACTION

Like a soft lure, the Power Tail swims at each fishing moment, both during breaks and recovery phases.

THOROUGH REINFORCEMENT ON ALL
POWER TAILS

SUPER DISTANCE

CAST

The whole difficulty with hard lures is being able to cast them far enough and precisely, without swimming too fast. The Power Tail Concept® was created to solve this problem!

HARD BAITS

Freshwater

"A UNIQUE LURE, A SPECIFIC DEVELOPMENT, AN EXCLUSIVE HOOK!"

We started from scratch to create a version of the Power Tail 30 specifically balanced for Area fishing. With the advice and experience of Guillaume Vernet, we found the best compromise between casting distance, recovery speed, balance and variety of use. All the elements are there for this XUL Power tail to become a must-have in its category.

XUL Action

Halfway between a Minnow, a Crank and a Button, the Power Tail completes the Area universe with excellence. A unique and unmissable lure !

OFFICIAL PARTNER

PWTSBH10

Single barbless hook developed in collaboration with VMC. Forged, lightweight and with a PTFE coating, this is the ultimate hook for the Power Tail 30!

SPIN THE SURFACE WITH THE
POWER TAIL TO ATTRACT FISH. LET IT GOING

"A TRUE 'POWER FISHING' LURE!"

Whether in flowing water like rivers and streams (trout and asp) or stagnant water like pond and lakes (perch, trout), its clever action will allow you to quickly catch any active fish in the area (Power Fishing). Accuracy and an optimized casting distance: a dense lure but which swims slowly thanks to the Power Tail Concept®.

Increased performance when retrieved slowly!

"LONG CASTING DISTANCE, IDEAL FOR HUNTING"

Ideal for hunting, when it is imperative to achieve good casting distances.
Indispensable in heavy seas when it is difficult to get close to the shore.
Effective when there is wind. Thanks to its fin the line remains tight, which allows you to keep in contact with the lure and feel what is happening!
Perfect on toothed fish such as barracuda or skipjack. Resistant, its thorough reinforcement allows for catching tuna or exotic fish.

your Power Tail
for tuna?*

MATERIAL

VMC Strong hook in 2/0 inline 7266.

VMC Strong Triple Hook in 1/0.

Decoy Strong Hook in 2/0 for the Power Tail Saltwater 100 mm.

Decoy Strong Hook in 1/0 for the Power Tail Saltwater 80 mm.

Technical
support

TECHNIQUE

The assembly with treble hook will be suitable for fish between 30 and 80 kg.

A single-tied hook assembly for fish over 80 kg is better.

We recommend the use of 200 pounds split rings (90 kg). It is safer to take a resistance 150 pounds minimum (70 kg).

"CEPHALOPODS CAN'T RESIST!"

Here is the French Touch of cuttlefish and squid fishing! In addition to traditional Asian methods, the Power Tail Squid allows you to offer a new vibration and thwart the habituation of sprawling beasts. Watch out, the approach is different!

Forget what you already know and use this lure in single casting/retrieving with softness and slowness. Don't rush it!

Power Tail Concept®

Glider head

The head of the Power Tail Squid fits perfectly on the bottom and offers a beautiful presentation of the lure. An impressive weapon for cuttlefish fishing!

Innovative hooking system

No snags!

Unlike existing squid jigs normally placed at the back of the lure, the one of the Power Tail Squid is located further forward on the body, and it won't get stuck on the bottom.

The cephalopod will grab the lure closest to the hooks for maximum success!

**“GLIDES WITH A SWAYING ACTION
TO FISH FOR SPARIDAE”**

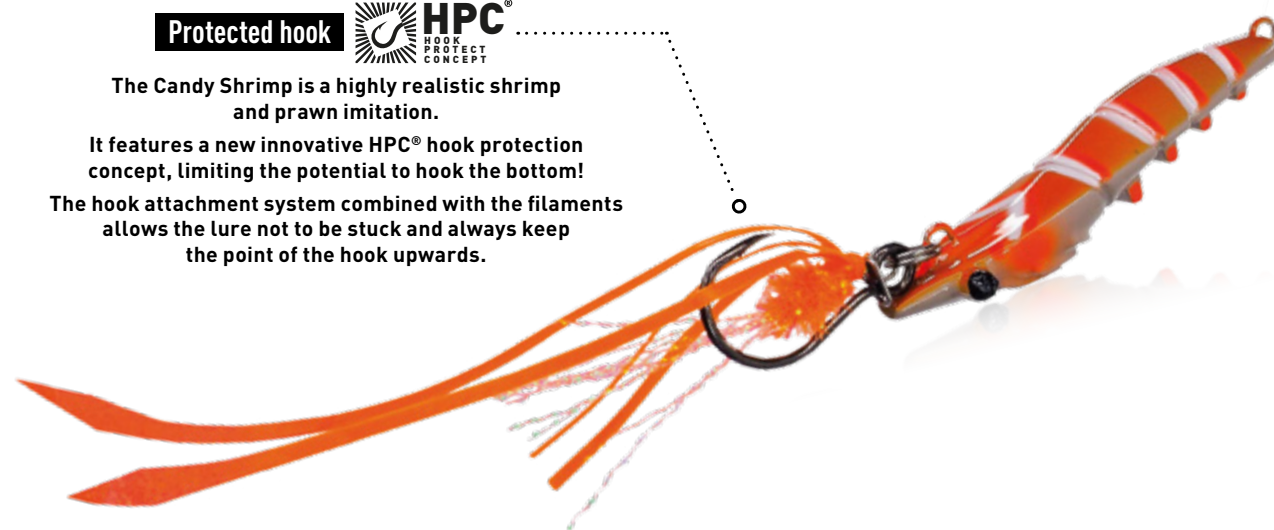

Protected hook

The Candy Shrimp is a highly realistic shrimp and prawn imitation.

It features a new innovative HPC® hook protection concept, limiting the potential to hook the bottom!

The hook attachment system combined with the filaments allows the lure not to be stuck and always keep the point of the hook upwards.

QUIET AREAS

Fish at
1g/1m
depth

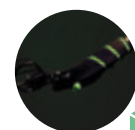

AREAS WITH STRONG CURRENTS

Fish at
2g/1m
depth

The UV effect

It does not emit light in complete darkness, but reflects ultraviolet rays. although this is not visible to the human eye, it is noticeable to many species.

The Glow effect

The phosphorescent effect emits light for a noticeable time after exposure to a light source. This makes the lure visible in poorly lit areas or at great depths. For maximum efficiency, recharge your lures using a UV lamp.

4 WEIGHTS

CSK	15 g	4,5 cm
CSK	30 g	5,5 cm
CSK	60 g	7,2 cm
CSK	90 g	8,3 cm

DIFFERENT WEIGHTS TO COVER ALL CONDITIONS!

Fishing with Inchiku type lures requires a careful selection of the weight. To be fully effective, the lure must stay slightly off the bottom while keeping a little angle between the rod and the line (diagonal fishing). Our selection of weight will allow you to find the best combination for your fishing conditions (depth & current).

WHY THE CANDY SHRIMP?

The sea bream has a small mouth full of teeth that can inflict serious damage. They are not easy to hook and are extraordinary fighters, an angler's dream! We had to develop a lure especially adapted to this predatory family! These fish are found mostly at the bottom of the water and at significant depths. We therefore had to create a small lure that could descend easily to the bottom with a minimal amount of snagging.

After several tests and different prototypes, here it is! Part of the Inchiku family, we offer you an irresistible sway swimming shrimp. Equipped with a patented anti-hook weapon system, the Candy Shrimp goes everywhere!
